

Reference Data Aggregation Service (RDAS)

API Documentation

Version: 1.0

Author: Tabitha Wanjiku Mwangi

Overview

The Reference Data Aggregation Service (RDAS) provides a REST API that aggregates country reference information from the CountryInfo SOAP Service and exposes it through JSON-based endpoints.

The API supports:

- Country search
- Filtering
- Pagination
- Sorting
- Country details lookup
- Currency-based country lookup

Base URL:

<http://localhost:8080/api/v1/mock>

Authentication

Currently no authentication is required.

Future enhancement:

- OAuth2
 - JWT Authentication
-

Endpoint 1: Search Countries

GET /countries

Description:

Returns countries matching supplied filters.

Query Parameters

Parameter		Type	Required	Description
name	String	No		Country name search
continent	String	No		Filter by continent
currency	String	No		Filter by currency
language	String	No		Filter by language
page	Integer	No		Page number
size	Integer	No		Page size
sortBy	String	No		Sort field
sortDir	String	No		asc or desc

Example Request

GET /countries?continent=Africa&page=0&size=10

Response

200 OK

```
{
  "data": [
    {
      "countryName": "Kenya",
      "capitalCity": "Nairobi",
      "continent": "Africa",
      "currencyCode": "KES"
    }
  ],
  "pageNumber": 0,
  "pageSize": 10,
}
```

```
"totalElements": 1,  
"totalPages": 1  
}
```

Endpoint 2: Get Country Details

GET /countries/{countryName}

Description:

Returns complete country information.

Example

GET /countries/Kenya

Response

200 OK

```
{  
  "countryName": "Kenya",  
  "capitalCity": "Nairobi",  
  "continent": "Africa",  
  "currencyCode": "KES",  
  "currencyName": "Kenyan Shilling",  
  "language": "English",  
  "dialingCode": "+254"  
}
```

Endpoint 3: Countries Sharing Currency

GET /currencies/{currencyCode}/countries

Description:

Returns countries that use the supplied currency.

Example

GET /currencies/KES/countries

Response

200 OK

```
[  
{  
  "countryName": "Kenya"  
}  
]
```

Endpoint 4: Continents

GET /continents

Description:

Returns available continents.

Response

```
[  
{  
  "code": "AF",  
  "name": "Africa"  
}  
]
```

Endpoint 5: Languages

GET /languages

Description:

Returns supported languages.

Response

```
[  
{  
  "code": "EN",  
  "name": "English"  
}  
]
```

Endpoint 6: Currencies

GET /currencies

Description:

Returns supported currencies.

Response

```
[  
{  
  "code": "KES",  
  "name": "Kenyan Shilling"  
}]
```

Error Responses

400 Bad Request

```
{  
  "status": 400,  
  "error": "Validation Failed"  
}
```

404 Not Found

```
{  
  "status": 404,  
  "error": "Country Not Found"  
}
```

500 Internal Server Error

```
{  
  "status": 500,  
  "error": "Internal Server Error"  
}
```

503 Service Unavailable

```
{  
  "status":503,  
  "error":"SOAP Provider Unavailable"  
}
```
